**Schneider Optics Announces Two New Dealers in Germany**

Schneider Optics announces the addition of two new dealers in Germany to represent their line of superior motion picture filters: Chrosziel GmbH, and Dedo Weigert Film GmbH.

Schneider Optics' prominent range of professional filters includes the Classic Soft<sup>®</sup> line, known for subtle softening characteristics, as well as Hollywood Black Magic<sup>™</sup>, Classic Black Soft, Black Frost<sup>®</sup>, Digicon<sup>™</sup> and Low Con 2000 — each designed to provide maximum imaging impact. To facilitate a DP's delicate light balancing act, Schneider Optics offers a range of Polarizing and ND filters, plus the Platinum IRND Series to reduce IR pollution with digital cinematography cameras. The brand also offers an array of color effect modifiers including new True-Streak<sup>™</sup> filters.

Available in popular sizes including 4x4, 4x5.65, 5x5, 5x5.65, 6x6, 138mm rounds and screw-on versions, Schneider Optics filters are manufactured in New York of water white optical glass.

Dedo Weigert Film <http://www.dedoweigertfilm.de> has served the industry for over 50 years and today is one of Europe's top importers, lighting product manufacturers, and rental houses for video and film equipment—serving professional film, broadcast and specialized photography.

Established in 1973, Chrosziel GmbH <http://www.chrosziel.com> develops and manufactures high precision mechanical, optical and electronic products such as Matteboxes, Sunshades, Fluid Zoom Drives, Follow-focus controls, as well as lens test collimators and projectors, which are sold worldwide.
